- Read Books

EDUCATION

Hanoi University of Industry   2021 - 2025

Faculty of Information Technology

4th year student

OBJECTIVE

With a solid knowledge base, I want to apply the skills that I have learned to a real-world environment, learn from experts, gain experience and contribute to project development to become a competent web developer.

WORK EXPERIENCE

Fresher FPT Software Academy   01/2025 - 02/2025

PROJECTS

WEBSITE FOR POSTING RECRUITMENT AND JOB APPLICATIONS   03/2025 - 06/2025

Building a website to support the connection between employers and candidates, helping the recruitment process take place faster and more effectively.

- Link github: https://github.com/nguyenduydai/TopJob
- Number of members: 01 (self-study project)
- Technology used:
  - Backend: Spring Boot, Spring Security, Spring JPA
  - Frontend: ReactJS, Redux, Ant Design
  - Database: MySQL
  - Other technologies: VNPay, Dialogflow, OAuth2, Thymeleaf, iText
- Main feature description (divided into 3 user roles):
  - Candidate: View, search for jobs, companies, apply for jobs; view, comment on news; manage personal information, application; register to receive job notifications by registered skills via email; support chatbot.
  - Employer: Add, edit, delete job postings; manage company information; manage application, send email to candidates; search for recommended CVs; upgrade account.
  - Administrator: Maintain information of companies, jobs, news, comments, applications, skills, users, roles, permissions, transaction history, export statistical report files.
